Marketing

Extended retailer text	The ultra slim, stylish Trust Entea is the all-in-one solution for operating tablets, smartphones, Apple TV and Smart TV's*. Ease of use and simplicity, the Entea works with every Bluetooth device in your house!
-------------------------------	---

Design & Comfort

Featuring its aluminum, ultra-thin and stylish design, the Entea fits into every interior. As the keyboard is compact and light, it is particularly suitable for using at your coach and taking it everywhere you go. The low-profile keys make sure typing is easy, comfortable and quiet. As the keys are placed into the keyboard separately and fit tightly, the chances of dust and dirt like breadcrumbs getting into your keyboard are reduced to a minimum.

Multi-platform: Works with every Android, Windows and IOS smartphone or tablet & Apple TV.

The Entea keyboard can easily be connected to your smartphone, tablet or laptop via Bluetooth. On top of that, the keyboard automatically recognizes the platform it is connected to: Android, Windows or iOS, unlike other keyboards, the Entea keyboard functions with every operating system! All media features of each specific operating system are available at your keyboard, e.g. the home button or the media functions (volume control, play/pause, next/previous).

The main advantage is: you just need one keyboard for operating your Android Smartphone or tablet (e.g. Samsung Galaxy S4 or Tab3), Apple iPhone or iPad, Apple TV, Laptop and Smart TV*.

Daily Use

Trust's Entea keyboard is particularly suited for use at home in your living room, on the road, at the office and at school. Looking up YouTube videos, typing messages in Whatsapp, E-mail, Facebook, Twitter, or writing long texts for your upcoming presentation, the Entea keyboard makes your life easy!

*Only for Smart TV's with Bluetooth keyboard support.
