Marketing

Extended retailer text	Whether you want deafening music at your party or relaxing background music during evenings: This Tytan 2.1 Stage can handle any situation!
-------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------

Characteristic design, powerful sound!

Like the name mentions, the characteristic design of this Stage is clearly inspired by the world of music, theatre and concerts. As both the subwoofer and the satellite speakers have wooden soundboards, this set provides optimal sound quality. In addition the metal grills provide the proper protection and a unique look. With 100W RMS (200W peak power) the Tytan Stage is particular powerful and capable of producing immense sound. The large subwoofer provides deep bass, the satellite speakers provide clear and high quality sound in the high and mid-range.

Choose your connection: Bluetooth or wired

This speaker features built-in Bluetooth, making it easy to connect wirelessly to your laptop, smartphone or tablet. In addition, it is of course possible to connect via 3.5mm cable to your PC, laptop or TV. For connection to your Xbox 360, PlayStation 3 or other game consoles, an RCA converter cable is included.

Easy to use

The control panel is placed on the side of the satellite speaker and has three controls to adjust bass, treble and volume to your desires. There are three buttons as well to mute, easily switch between Bluetooth and cable and to put the speaker into Bluetooth pair mode.

Smart Power Management

To save energy, the speaker automatically switches to standby mode when not used for 15 minutes. Once your device starts to play music again, the speaker automatically turns back on.
