System requirements	- 12V DC car socket

Marketing

Extended retailer text	<p>The Trust Car Power Inverter gives you the chance to charge or power all your devices via the car battery. Just plug it into your 12V car power socket, and it will function as a 230V output socket to charge or power your laptop, portable DVD-player, or smartphones and navigation systems (via the 1A/5W USB port).</p> <p>A 230V socket in your car</p>
-------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

The 150W power inverter turns your 12V car power socket into a 230V socket to charge all your devices while on the road. Easily connect your device with a compatible 230V wall socket plug and enjoy the freedom of charging wherever you're going.

On-the-go charging in any situation

Benefit from the Trust Car Power Inverter when you're a lot on the road for work and need a fully charged laptop at all times. Just charge it while driving or be able to keep working while being in the passenger's seat. Going on vacation? During long trips you can be sure of an all-time powered portable DVD-player or tablets.
