System requirements	- PC / Laptop with USB port - Windows 10, 8, 7 or Vista

Marketing

Extended retailer text	Experience the impressive tactile accuracy and response with every keystroke you type. With the quick responding GXT-White switches your opponents will be amazed by your speed and responsiveness. Whether you are gaming, coding, or typing reports, the GXT 880 Mechanical Gaming Keyboard is designed to last!
-------------------------------	--

Unbeatable speed & responsiveness

The 104 keys contain special mechanical switches, which are designed to last up to 50 million keystrokes. This GXT-White Linear switch has a 45G Actuation Force, 2.0mm key travel and 5ms response time, which means that you will need less effort to beat your enemy. As the switch will register a keystroke even if it is only pressed halfway. This makes the GXT 880 Mechanical keyboard ideal for those who demand maximum speed and precision.

Programmable Macros

With the onboard memory you can even program 4 macro keys to perform a sequence of up to 60 actions. The special game mode switch ensures that you will not return to your desktop accidentally when hitting the Windows key, since it disables the key during your gaming session.

Illuminated

The GXT 880 Gaming Keyboard features a white backlight and enhanced key illumination which is adjustable in brightness. With the GXT 880 you can program 6 lighting patterns, to fit your needs. This makes the GXT 880 very suitable for gaming when there is not much light.

100% Anti-Ghosting

The GXT 880 has n-key rollover anti-ghosting hardware, which ensures that every keystroke combination can be registered. This is ideal for MMO, RTS and FPS games, in which often many different key combinations are used simultaneously. Thanks to the anti-ghosting feature you will never have the problem that your keyboard did not register your killstreak or advanced combo. Never miss a single key with the GXT 880!
