### Marketing

Extended retailer text	<p>Enter a new world which is dynamic, amusing and thrilling at the same time, wherever you are. Discover Virtual Reality with the Trust Exos 3D VR glasses for your smartphone!</p> <p>Endless possibilities</p>
------------------------	---

Ride thrilling rollercoasters, go skydiving, discover Tokyo, visit Jurassic park or enjoy a space journey. Look left, right, up, down, or even turn around; your smartphone automatically detects where you are looking at and adjusts the view.

With the Trust Exos you can play over 100 virtual reality games which are available in the Apple App Store and Google Play Store, and experience 3D and 360° videos on YouTube or via other video services.

#### Comfortable and adjustable design

The Trust Exos will make your virtual reality experience as comfortable as possible, with its soft rubber padding and the three adjustable head straps. The wheel on top allows you to adjust the distance between the two lenses to the distance between your eyes (IPD), while the focus distance can be controlled by turning the wheel placed on the side of the Trust Exos. The settings of the VR glasses can therefore be fine-tuned to fit your preferences, ensuring ideal and comfortable conditions for hours of virtual reality fun.

#### Easy to use

Whenever you feel like enjoying the Virtual Reality experience, simply place any smartphone up to 80 x 150 mm (5.5" display) in the Trust Exos, and you can start enjoying the possibilities virtual reality has to offer. You can still easily access your smartphone's connections, allowing you to use your headphones or even charge your smartphone while using the VR glasses.

#### Augmented reality

Next to VR games and videos, the Trust Exos also supports augmented reality. Simply open the camera door at the front of the glasses and use an augmented reality app with AR-supporting catalogues, brochures, museums, videos, etc.
