## Marketing

Extended retailer text	<p>When you are looking for a professional gaming mouse for precise shooting in your favourite first-person shooter game, the GXT 177 is exactly what you need. Designed with our ECVisualize gaming team the GXT 177 brings you a high precision laser, 16.8 million custom colours and 8 programmable buttons.</p> <p>High precision laser sensor</p> <p>The GXT 177 Pro Gaming mouse comes with the best sensor available: The Avago 9800. The A9800 sensor is accurate and enables you to configure the mouse exactly as you like. So no matter on what surface you use it, you'll get the best result possible! The DPI of the mouse can be set between 100 and 14400 DPI. This means you</p>
------------------------	--

can set it as high or low as you wish, for detailed sniper shooting in shooter games or for quick map moves in real time strategy games.

#### Customizable RGB Lighting

Personalize your gaming set-up and choose your favourite colour from the 16.8 million colours available with the Trust Gaming software. With the software you can also adjust the brightness or create lighting effects.

#### Ambidextrous design

The GXT 177 has a symmetrical design, which makes it suitable for all gamers, left or right handed. Perfect for households with left- and right handed gamers and for switching hands during intense gaming sessions. The mouse also has a special coating that gives you extra grip when your hands get slippery from all the excitement.

#### Programmable buttons

The GXT 177 gaming mouse has 8 programmable buttons that are easy to reach. You can program the buttons by using the supplied gaming software. With this gaming software you can create and assign macro's to all buttons, to perform up to 34 actions with one simple click.

#### Advanced gaming software

The GXT 177 Pro-gaming mouse comes with software that allows you to change profiles, button assignment, macro's, speed and light settings.

You can store up to five different profiles with all of your personal settings. This way you don't have to change all of your settings every time you switch from an adventure game to a racing game. The profiles are saved into the mouse's internal memory (64kb), so when you plug your mouse into a different compute, the profiles will still be available.

## Specifications
