System requirements	- PC / Laptop with USB port - Windows 10, 8, 7, Vista

Marketing

Extended retailer text	This mouse is the ultimate gaming mouse: fast response time, extreme precision, comfort and fully configurable according to your needs. 11 programmable keys Apart from the five programmable buttons on the thumb panel, the mouse has 6 other easily accessible buttons. This provides a significant advantage in comparison to players who only use the keyboard. While other players have to search for the correct key, you can execute pre-programmed commands without taking your eyes off the screen.

Design

This well-designed gaming mouse has an ergonomic design with a practical placement of buttons and rough coating on the sides that ensures a solid and perfect grip during your gaming sessions. The 1.9 meter braided nylon cable glides easily on your desk and withstands heavy use. The weight is adjustable with 8 metal weights of 2 grams each.

Advanced gaming software

With the enclosed new software, the mouse is customizable to your own preferences. You can store up to five different profiles with all your personal settings. With the new gaming software you can adjust the DPI (up to 4000), polling rate, rate per second, LED color, double-click button and scrolling speed to your preferences and combine this settings into one profile. Since the gaming profiles are stored in the mouse, you do not need to set up the profiles again when connecting the mouse to another computer.

Specifications

Weight of main unit	152 g
Height of main product (in mm)	124 mm
Width of main product (in mm)	89 mm
