System requirements	<ul style="list-style-type: none"><li>- Audio player (phone/tablet/computer/mp3 player) with Bluetooth or 3.5mm headphone connection</li><li>- Wall power connection (to charge battery)</li></ul>

### Marketing

#### Extended retailer text

Turn any gathering into a lively party, with the colourful lightshow of the Fiesta Disco Wireless Speaker. This Bluetooth speaker produces powerful sound, has an internal battery that lasts your entire party and is easy to move around. Get the party started every time, by combining your favourite music with the amazing visual effect of the light show.

#### Disco-on-the-go

The Fiesta disco is more than just a party speaker. It's a complete disco to take along anywhere you like! The disco light on top of the speaker offers you a room filling, multi-colour led light show. The built in beat detection lets your disco light respond to the music you're playing, to have your lights match your party. The lights can be set in four different settings: off / random colour / random coloured light matching the beat of the music / white light matching the beat of the music.

#### Portable

Thanks to its two wheels and a retractable handle the Fiësta Disco is easy to move around. In addition, the speaker can be picked up with the two handles on the side. Because of its sturdy design you can easily transport the speaker without having to worry about damaging it.

#### Powerful sound

With its powerful 50W sound, the Fiësta Disco speaker brings you more than enough volume to get your party started. Use the included microphone for a festive karaoke party and surprise all your guests with the sound this speaker brings you. Each sound input has its own volume control and with the master volume you can control them all at once.

#### Connections

Connect your smartphone, tablet or laptop easily through Bluetooth. Don't have Bluetooth? Then you can use the included 3.5mm aux jack to plug them into the speaker.

#### Lasts as long as your party

The Fiësta Disco has an internal battery which lasts from 5 to 50 hours depending on the volume and light setting. The battery is easily recharged with the included power cable. If your battery runs out during a party, you can continue to use the speaker by connecting it to a power socket.

If your phone or tablet battery runs out, you can even connect them to the speaker's USB port for easy charging.

## Specifications

#### Total weight

12.000 g

#### Height of main product (in mm)

510 mm

Width of main product (in mm)	380 mm
