Marketing

Extended retailer text	<p>Take control in your favourite games and create an advantage on your competitors with the GXT 285. Whether you're into MMO games like World of Warcraft or FPS games like Call of Duty, the GXT 285 is the perfect keyboard for any kind of game.</p> <p>Comfortable design</p> <p>Because of its ergonomic design and its comfortable layout, the GXT 285 is perfectly suitable for long gaming</p>
------------------------	---

sessions. Since the GXT 285 features 6 multimedia keys, you can easily control your music while you are into a game. The special game mode switch ensures that you will not return to your desktop accidentally when hitting the Windows key, since it disables the key during your gaming session.

3 custom profile keys

The GXT 285 allows you to create and store three different custom gaming profiles on the on-board memory, and switch between these profiles by a single click of a button. You are always ready to play different kind of games with different customized profiles. Just plug in your keyboard into any PC and play your favourite games without having to change settings first. In addition to this feature, you can also create up to 5 different macros for a series of keystrokes.

Illuminated

The GXT 285 Advanced Gaming Keyboard illuminates in 3 different colours (red,blue and purple) which are adjustable to your own preferences. And besides the colour also the intensity of the LED can be customized.

Gaming Software and Anti-ghosting

Thanks to the included gaming software, the GXT 285 Advanced Gaming Keyboard can be customised to suit your needs. The functions of the buttons are easily customizable, so you can make an ideal layout that fits perfectly with your game of choice. The GXT 285 has advanced anti-ghosting hardware, which ensures that every keystroke (up to 12 different keys) can be registered. This is ideal for MMO, RTS and FPS games, in which often many different key combinations are used simultaneously. Thanks to the anti-ghosting feature you will never have the problem that your keyboard is stopping you from having a killstreak or advanced combo.
