Marketing

Extended retailer text

It is always streaming open mic night with the Signa HD Studio Microphone! With this professional microphone, everybody steps onto the virtual stage with crystal clear sound. Every singer, podcaster, vlogger and streamer will get noticed!

Professional sound

Whether streaming on Twitch and YouTube or recording new songs and podcasts, the excellent audio quality of this microphone brings your sound to a higher level. The Signa supports 24 bit/96 kHz high definition sound. The cardioid recording pattern allows the microphone to focus on sound in front of the microphone while reducing sound from the background. This allows you to record very focused; exactly the way you want it.

Plug & Play

Simply plug the USB cable in your PC or laptop and you can instantly use the microphone. The Signa also features a 3.5mm headphone output with direct mix control for zero-latency monitoring, making sure you can hear yourself real time, in the mix. Connect and don't hold back; let the world hear your warm, rich sounds.

Stable sound recording

The Signa HD Studio microphone is equipped with a tripod stand to perfectly position it. Thanks to the detachable 180cm USB cable, you can place the microphone anywhere on your desk. The robust housing and foam windscreen make it the perfect choice for every (semi-) professional streamer. You can really perform, sing or have your own streaming party!

Specifications

Total weight	560 g
Height of main product (in mm)	29 mm
