Marketing

Extended retailer text	Control every corded device remotely. This socket switch is a perfect way to get acquainted with smart control by Trust Switch-in. Just plug the socket switch into the socket, insert the plug of your corded lamp or appliance and use a Trust Switch-in transmitter of choice to operate it remotely.
-------------------------------	---

- Compact socket switch: does not block neighboring outlets
- Suitable for all lamps and appliances up to 2300 Watts
- Connection with child safety shutters
- Combine with a Trust Switch-in transmitter, such as a remote or wireless wall switch

Become acquainted with wireless control!

The smart socket is a good way to become acquainted with wireless switching and a smart home. The socket switch works with any Trust Switch-in transmitter so that you can easily operate the socket at a distance.

A wireless solution

Why control every light in your home manually when you can do it from the comfort of your couch with just one push of a button. With our remote control (sold separately) you can operate all your corded lamps and devices from a distance.

Compact design

Due to the compact design of the socket switch, it can be placed in any (indoor) power outlet without blocking adjacent outlets. This means that you can always use several switches next to each other.

In addition, the plugs are equipped with child safety shutters so that they can be used safely throughout the house.

A smart backyard

Trust Switch-in also has a smart socket for your garden or balcony: the AGC-3500 outdoor socket, to control all your outdoor lighting and appliances with a remote or other transmitter. Ideal if you prefer to stay inside to switch on the garden lights in the winter or on a rainy day.

Expand your smart system easily

Would you like to add more socket switches or do you want to operate these with a wireless wall switch, movement sensor or smartphone in addition to the remote control? No problem. You can add multiple transmitters.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the lights go on at night when you're on holiday and the boiler is switched off when the CO detector detects a carbon monoxide leak.
