

Trust Smart Home AWST-6000 Wireless motion sensor - White ML

Wireless indoor motion sensor to automatically switch lights/devices when motion is detected

Article number: 71013
Barcode: 8713439710137
GTIN: 08713439710137

Core content

Brand	Trust Smart Home
Product line	Start line
Product type	Wireless motion sensor
Colour	White
Plug country code	ML
Key features	- Can easily be placed anywhere indoor with included double sided tape and/or screws - Long life battery (battery not included) - Transmission range up to 30 meters - Saves energy: lights/devices are switched off automatically after 5 seconds or 1, 5 or 10 minutes - Can be combined with a wireless doorbell so you can hear when motion is detected
Package contents	- Wireless indoor motion sensor (battery not included) - Screws and double sided tape - Manual
System requirements	- Two AAA alkaline batteries - Trust Smart Home receiver

Marketing

Extended retailer text	Wireless motion sensor for automatically switching lights and devices on and off when motion is detected. Ideal for automating lighting in the hall closet, toilet or near a staircase.
-------------------------------	--

- Wireless: can be placed anywhere
- Transmission range up to 30 metres
- Saves energy: lights/appliances switch off automatically after 5 seconds or 1, 5 or 10 minutes
- Can be combined with a wireless doorbell so you hear when movement is detected

The AWST-6000 wireless motion sensor can be installed anywhere in the home without the hassle of installing wires. The transmitter runs on batteries. You can then use the supplied mounting hardware to install the wireless motion detector at a desired position indoors. As soon as movement is detected, this wireless motion detector automatically switches on one or more Trust Switch-in receivers of your choice.

Never longer than necessary

After no more movement is detected, the lights or appliances are automatically switched off again. This can be set to 5 seconds or 1, 5 or 10 minutes. The light sensitivity is also adjustable: high (always), medium (evening and night) and low (only at night).

Thanks to the automatic switch-off function, the lights never stay on unnecessarily. Ideal for the toilet or bathroom. This way, you can make sure that when you enter the toilet or bathroom, the lighting automatically comes on and also goes out automatically. In this way, lighting never remains switched on unnecessarily. Of course, you can also place a motion detector on a landing, so that the lights there are not left on unnecessarily.

Good range

The motion detector has a maximum detection range of six metres, so you can be sure that when you enter a room or open a cupboard, the lights will automatically switch on. The AWST-6000 can be combined with Trust Switch-in Start-line receivers, such as a plug-in switch or a built-in switch.

From smart solutions to a Smart Home

With the Smart bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
