Core content

Brand	Trust Smart Home
Product line	Start line
Product type	3-in-1 Build-in switch
Colour	White
Plug country code	ML
Key features	- Allows you to switch up to 3 lights/devices wirelessly - Can easily be installed in a closet or junction box - IP56 Splash proof junction box available to install this product anywhere outdoors
Package contents	- 3-in-1 built-in switch - Manual
System requirements	- Trust Smart Home transmitter

Marketing

Extended retailer text	<p>The 3-in-1 build-in switch makes it possible to remotely control three different lamps or devices.</p> <p>Link your lights and devices to the build-in switch and combine it with a transmitter of your choice. For example, connect all of your (grouped) built-in spotlights and operate them individually using one and the same remote control.</p>
-------------------------------	--

If you want to use the 3-in-1 switch outside, then place it in the splashproof mounting box (OWH-002). In this way, you can, for example, make your outdoor lamp, patio heater and pond pump smart with one receiver.

- Operate up to three lamps/appliances wirelessly
- Can easily be placed in a cabinet or junction box
- Maximum load up to 3500 Watts
- Can also be used outside (in combination with the splashproof mounting box OWH-002)

The ACM-3500-3 3-in-1 build-in switch is intended for wireless switching on/off of lights or equipment up to 3500 Watts, divided over three outputs. This means you can operate three lamps and/or devices wirelessly with this receiver. Per output you can register up to six Trust Switch-in transmitters of your choice.

Smart outdoor solution

The 3-in-1 is also an ideal solution for outdoors people who want to control their lights and devices smartly. For example, you can remotely control an outdoor lamp, a pond pump and a heater by connecting all three to the built-in switch.

You can hang the switch in the shed, for example, or use the OWH-002 splashproof mounting box to mount the switch outside.

From smart solutions to a Smart Home

With the Smart bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
