Marketing

Extended retailer text	Switch and dim Trust Switch-in receivers wirelessly.
	- Wireless: attach anywhere
	- Save energy: lights and devices can be switched off automatically after 5 or 30 seconds, 2, 10 or 30 minutes or 1 or 3 hours

- Transmission range up to 30 metres
- Compatible with all Trust Switch-in Start-line receivers

Want to install an (extra) switch, but don't have a connection point? This wireless single wall switch can be placed anywhere in your home, without the hassle of wiring diagrams, routing cables or pulling wires. Combine the switch with a Trust Switch-in build-in switch, dimmer or smart plug and operate your lamp or appliance wirelessly with the wall switch.

Switch to wireless control

With the AWST-8800 wireless wall switch, you easily switch your Trust Switch-in receivers on or off. The switch can be placed anywhere in the house, without the hassle of wires or high voltage. This is because the transmitter runs on batteries. With one push of a button, you control your home wirelessly from now on!

Extensive possibilities

With the AWST-8800, you can always switch your Trust Switch-in receivers from the perfect location in your home. For example, you can easily control your lighting, electrical appliances (in combination with ACC-2300) and roller shutters and blinds (in combination with ASUN-650). With the supplied mounting material, you place the switch at the ideal location in your home. So even after a renovation, for example, you will still have your switch in the right place.

Combine for more

The wireless single-pole wall switch also has the option to automatically switch off lights or appliances thanks to an adjustable switch-off function. For example, you can automatically switch off a fan after 5 or 30 seconds, 2, 10 or 30 minutes or after 1 or 3 hours. Ideal for switching off an extraction system, for example.

Long range

The signal from the wall switch passes through walls, windows and doors and has an indoor range of up to 30 metres. This combined with the long battery life makes this wall switch suitable for any home.

From smart solutions to a Smart Home

With the Smart Bridge , you lay the foundation for your smart home. Link all your Trust Switch-in products to the Bridge and control everything – from lights to electric curtains – with your smartphone or tablet. Or set timers, rules and scenes as you wish to fully automate your system. For example, the lights go on at night when you're on holiday and the central heating boiler switches off when the CO detector detects a carbon monoxide leak.
