

Trust Smart Home APIR-2150 Wireless motion sensor - Black ML

Wireless outdoor motion sensor to automatically switch lights/devices when motion is detected

Article number: 71091
Barcode: 8713439710915
GTIN: 08713439710915

Core content

Brand	Trust Smart Home
Product line	Start line
Product type	Wireless motion sensor
Colour	Black
Plug country code	ML
Key features	- Can easily be placed anywhere outdoor with included double sided tape and/or screws - Long battery life (battery not included) - Transmission range up to 30 meters - Saves energy: since lights/devices are switched off automatically after 5 seconds or 1, 5 or 10 minutes - Can be combined with a wireless doorbell so you can hear when motion is detected - IP64 waterproof
Package contents	- Wireless outdoor motion sensor - Screws and double sided tape - Manual
System requirements	- Two AAA alkaline batteries - Trust Smart Home receiver

Marketing

Extended retailer text	With the wireless outdoor motion sensor, you can switch outdoor lights and devices on and off automatically when movement is detected. An ideal solution when lights need to be switched on briefly, for example when you
-------------------------------	---

come home in the dark or if you need to quickly go to the shed in the evening.

- Wireless: can be placed anywhere outdoors
- Transmission range up to 30 metres
- Save energy: lights/appliances can be switched off automatically after 5 seconds or 1, 5 or 10 minutes
- Also works in combination with a wireless doorbell: rings the bell when motion is detected
- Waterproof (IP64)

The APIR-2150 wireless motion detector can be mounted anywhere outdoors, without the hassle of installing wires. With the included mounting materials you can place this wireless motion detector in the desired position and as soon as motion is detected, the detector will automatically switch on one or more Trust Switch-in receivers.

For example, you can automatically switch on your garden lighting as soon as you enter the garden by combining the motion detector with a build-in switch or an outdoor socket switch.

If no more movement is detected, the lighting or device is automatically switched off again. This can be set to 5 seconds or 1, 5 or 10 minutes. The light sensitivity is also adjustable

Save on unnecessary consumption

Thanks to the automatic switch-off function, lighting never stays on unnecessarily. Ideal for outdoor lighting. You can ensure that when you enter the garden, the lighting automatically switches on and off again. In this way, lighting never stays on longer than necessary.

Ding dong, something is moving!

The motion detector offers the possibility of signalling unwanted visitors. This way, you can not only switch on a lamp, but also play a melody from the wireless doorbell. This way, you do not only see that there is unwanted company, but you can also hear it.

Suitable for any garden

The motion detector has a maximum detection area of six metres and a transmission range of up to 30 metres. This means that you can use the detector in most gardens without any problems.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in devices to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
