Marketing

Extended retailer text	Control your outdoor lighting and appliances with this wireless outdoor wall switch. Place it anywhere you want in the backyard, shed or on the balcony and combine it with – for example - a Trust Switch-in socket switch or dimmer. In this way, you always have a switch nearby, even outdoors. - Double switch

- Splashproof (IP44)

- Operates on one battery (included)

- Can be placed anywhere

- Transmission range up to 30 metres

How nice would it be if you could control your outdoor lighting from your garden? With this wireless wall switch, you never have to go inside to switch your garden lights on or off again. Screw it next to the (shed) door, on the fence or stick it under the garden table and from now on you have a switch at hand when you are relaxing in the garden.

Combine with a receiver of your choice
Use the wall switch in combination with, for example, an outdoor plug (available as a switch and as a dimmer) and make every outdoor lamp smart.

If you have a wall lamp – for example on the shed - you can equip it with a build-in switch or dimmer and operate it using the wall switch.

The wireless outdoor wall switch can be combined with all Trust Switch-in Start-line receivers. You can connect multiple receivers to the switch in order to operate multiple lights or devices simultaneously.

A switch for every application
With the outdoor wireless wall switch you can switch your desired Trust Switch-in receivers from anywhere in the garden, shed or on the balcony. So you can easily operate your outdoor lighting or electrical equipment, for example the patio heater, without having to go inside. The included mounting material allows you to place the switch at the ideal location for you.

From smart solutions to a Smart Home
With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in devices to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
