Extended retailer text

Make your life colourful. Select one of the 16 million colours for a pleasant atmosphere or choose cool, white light for those situations that require optimal concentration. With the Trust GU10 Dimmable LED Spot, you can show your true colours!

Live your life in colour

Easily create a romantic atmosphere with warm light, or support your favourite sports team by colouring your living room in the club colours. Use the app to select one of the 16 million colours: there is always a perfect colour! * The spot is dimmable from 10% to 100% via the app or the ZYCT-202 remote control. In this way, our lights are always set to perfection.

*Note: ZigBee Control Station Z1 or ICS-2000 Internet Control Station is required for app use.

Natural light throughout the day

Want more natural light in your home? The RGBG6 GU10 LED Spot creates the perfect light in every room, at any time of day. With the help of the rules in the Trust Smart Home app, you can easily set the light intensity according to the time of day: cool lights in the morning, regular intensity in the afternoon and warm light in the evening. * When you turn on the spot, the light intensity set for that time of day is automatically selected.

Easy installation

The spot can easily be placed in any GU10 socket when this socket is connected to a regular switch and not a dimmer switch. The dim function is integrated into the spot itself. The regular light switch is of course still usable to turn your lights on and off. You can dim your lights from the comfort of your couch using the remote control or the app. * Want some colour in your life? Simply use the app!

ZigBee Compatibility

This spot is part of the Trust Smart Home ZigBee line. This means that it is compatible with the other products from the ZigBee range. These products are easily identified by their product code, which always starts with a "Z". For example: "ZLED-RGBG6", "Z1" or "ZYCT-202". This spot is also compatible with the Trust Smart Home ICS-2000 control station.

All of these products work on the ZigBee protocol, the benefits of which are:

- Two-way communication: the products can send as well as receive signals. This means, for example, that you can see in the app whether a lamp is turned on or off. Very convenient for when you're not at home!
- Meshing network: all connected ZigBee products can receive and repeat signals, making each ZigBee product an amplifier that increases the range of your ZigBee network.
- Compatibility with other brands: The Trust ZigBee products are also compatible with other ZigBee certified systems such as Philips Hue, Osram Lightify or IKEA TRÅDFRI.

Economical solution

The Trust ZLED-RGBG6 spot has a light output of 350 lumens which is comparable with a conventional 60-watt bulb, however, this LED bulb only uses 6 watts! LED lights use less energy: up to 90% less than a normal bulb.

With this energy efficient ZLED-RGB6 spot, you can easily save money. This is not all, the spot has a lifespan of 20.000 hours which means you can create perfect lighting in your home for the next 20 years!
