Wireless contact sensor to switch lights/devices and/or notify you when a door or window has been opened

Article number: 71169
Barcode: 8713439711691
GTIN: 08713439711691

Core content

Brand	Trust Smart Home
Product line	Zigbee line
Product type	Wireless contact sensor
Colour	White
Plug country code	ML
Key features	- Automatically turns on lights when you enter a room - Increase your home security, receive push notifications on your smartphone/tablet when a door/window is opened - Can be easily installed on a door/window (indoors) - Long battery life (battery included)
Package contents	- Wireless contact sensor with battery included - Mounting materials - Manual
System requirements	- Trust Smart Home bridge/control station (e.g. Z1 ZigBee Bridge or ICS-2000)

Marketing

Extended retailer text	The smart wireless contact sensor combines smart control with smart security. By placing the sensor near a door or window, you can switch on lights or appliances when the door or window is opened and receive a push notification on your smartphone.
-------------------------------	--

- Wireless: can be placed near any door or window
- Turns on lights automatically when you walk into a room
- Receive push notifications on your smartphone/tablet when a window/door is opened.
- Can easily be installed on a door/window (inside)
- Save energy: switches lights on automatically when you enter a room and saves energy by switching them off when you leave
- Please note: to use this sensor, a Smart Bridge is required.

Comfort starts with a home that is perfectly attuned to your life. Add the contact Sensor to your smart home to automatically turn on (or off) your lights or appliances when a door or window is opened. Despite its small size, this contact sensor offers a great sense of comfort and security in every home.

Open for comfort

This contact sensor offers various possibilities for automatically switching lights on or off when the sensor is triggered. So you no longer have to search for the light switch when you open a door in the dark, or a soft light comes on on the landing when you go to the toilet at night. Do you often forget to turn off the lights? Set them to turn off again automatically when you leave the room. Experience the comfort of automation!

Comfort at your fingertips

Connect the smart contact sensor to the Smart Bridge to set up rules for the sensor. This way you can, for example, program when the sensor is active via the free Trust Switch-in app. With this you can easily set the sensor to switch on at sunset and off again at sunrise. With the app you have endless possibilities at your fingertips!

Safe away from home

This sensor does not only offer comfort, but also a sense of security thanks to the possibility of setting up push notifications. This way you get a notification on your phone when a door or window is opened. You can also choose to follow up on this notification by activating other Trust Switch-in receivers to automatically switch on your lighting and deter unwanted guests.

Easy installation

Place the contact sensor on a window or door of your choice by using the supplied double-sided tape. The sensor offers long-term comfort and security with its long battery life.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the lights go on at night when you're on holiday and the boiler is switched off when the CO detector detects a carbon monoxide leak.
