System requirements	- Trust Smart Home bridge/control station (e.g. Z1 ZigBee Bridge or ICS-2000) - 2x AAA-Alkaline batteries 1.5V (not included)

Marketing

Extended retailer text	The smart wireless motion sensor combines smart control with smart security.
-------------------------------	--

By placing the sensor you can switch on lights or appliances when the sensor detects movement and receive a push notification on your smartphone.

- Wireless: can be placed anywhere
- Automatically turn on lights when motion is detected
- Receive push notifications on your smartphone/tablet when motion is detected
- Save energy: switch off lights when no motion is detected anymore
- Large detection angle of 120 degrees (horizontally)
- Please note: to use this sensor, a Smart Bridge is required.

Comfort starts with a home that is perfectly attuned to your life. Add the Contact Sensor to your smart home to automatically switch on your lights or appliances when motion is detected.

You also have the option of receiving a push notification, so that you are immediately alerted to any unwanted guests. So you can combine smart control with smart security.

Convenience in motion

The possibilities are endless. You no longer have to search for the light switch when you walk into that dark garage, or automatically switch on a soft night light when the children go to the bathroom at night. This smart motion sensor is made for comfort. You can also easily save energy by having your lights turn off automatically when no more movement is detected. Ideal for those who often forget to turn off the lights!

Comfort at your fingertips

Connect the smart motion sensor to the Smart Bridge to set up rules for the sensor. In this way you can, for example, use the free Trust Switch-in app to set when the sensor is active. This way you can program the sensor to switch on at sunset and switch it off at sunrise. With the app you have endless possibilities at your fingertips!

Cleverly secured

This sensor not only offers comfort, but also a sense of security thanks to the push notification function. This way you get a notification on your phone when the sensor detects movement. You can also choose to follow up on this notification by activating other Trust Switch-in receivers to automatically switch on your lighting and scare off unwanted guests.

Easy installation

The motion sensor can easily be placed on any surface or hung on a wall. The sensor offers long-term comfort and security with its long battery life.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the lights go on at night when you're on

holiday and the boiler is switched off when the CO detector detects a carbon monoxide leak.
