

Trust Smart Home ACM-250-LD Build-in dimmer - White ML

Build-in dimmer to remotely control existing lighting, while existing wall switches remain operational

Article number: 71213
Barcode: 8713439712131
GTIN: 08713439712131

Core content

Brand Trust Smart Home

Product line Start line

Product type Build-in dimmer

Colour White

Plug country code ML

Key features

- Suitable for all types of dimmable lighting - Existing wall switches remain functional - Also works in an existing hotel switch (e.g. at the top and bottom of a staircase) - Choice between two specific dimming modes (phase on and phase off), so that it can dim any dimmable light nicely.
- Compact design; easy to install 'invisibly' in the ceiling or junction box
- Dimming memory: remembers last dimming setting
- High performance; dims LED from 3-50W, hallogen lighting up to 250W
- Combine with all transmitters in the range, for example the AWST-9000 wireless wall switch, to easily create a hotel circuit
- Combine with the Smart Bridge to operate and automate the dimmer with your smartphone.

Package contents - Build-in LED dimmer - Manual

System requirements - Trust Smart Home transmitter - Dimmable LED/Incandescent/Halogen light* * A good quality dimmable light is advised for proper, noise-free operation

Make all your lights smart

The pendant lamp over the dining table or the ceiling light in your home office: whatever light you have, the build-in dimmer makes it remotely dimmable in a flash. Install the dimmer behind the ceiling tile or ceiling light and use a Trust Smart Home transmitter of your choice to control your light remotely.

Control it your way!

The build-in dimmer can be controlled with any Trust Smart Home transmitter, such as remote control or the wireless rotary dim button. Or connect the dimmer to the free Trust Smart Home app (via the Smart Bridge) and control your lights with your smartphone, even when you're not at home.

Retain your existing wall switches

We understand that you prefer to keep your existing wall switches. With the ACM-250 build-in dimmer, your existing wall switches will continue to do their job. You can even connect up to two existing wall switches, such as at the top/bottom of a staircase.

Expand easily

With Trust Smart Home the possibilities are (almost) endless. Would you like to link several transmitters? No problem at all. For example, combine a wireless rotary dim button with a remote control to control your lights from multiple locations. Even when using multiple transmitters, the dimmer remembers the last dim setting you selected.

From clever solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Smart Home products to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you're on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

Specifications

Total weight	193 g
---------------------	-------

Weight of main unit	79 g
----------------------------	------

Height of main product (in mm)	45 mm
---------------------------------------	-------

Width of main product (in mm)	40 mm
--------------------------------------	-------

Depth of main product (in mm)	15,2 mm
--------------------------------------	---------

Controls	lights on/off
-----------------	---------------

Indicators	Power
Input frequency of main device	50 Hz
Input voltage of main device	230 V
Standby power	1 W
Max number of transmitters supported	32
Dimming modulation	leading-edge trailing-edge
Intended installation	build-in
Number of traditional wall switches supported	2
Possible to connect traditional wall socket	No
Possible to connect traditional wall switch	Yes
Required electrical power wires	220V Null
Supports stairwell circuit	Yes
Wireless range	40 m
Cables included	No
Code system	Automatic
Start Line Product type	receiver
Max power per supported lamp/device type	20-250W Resistive load 3-50W Dimmable ESL/LED
Output voltage	230
Power output	Yes

Total max output power (W) 250 Watt

Power adapter included No
