Package contents	Build-in switch Manual
System requirements	Trust Smart Home Transmitter

Marketing

Extended retailer text	Switch it wirelessly
	With the ACM-2000 build-in switch you can easily switch your lights or other appliances wirelessly. Install the switch in a ceiling cap, junction box or in a cabinet and then combine it with one of the Trust Switch-in

transmitters, such as a wireless wall switch, remote control or even with the app (in combination with the Smart Bridge).

Optimal control at home

The ACM-2000 enables you to remotely control all your lighting, from wall lamps to the lamp above the dining table. But the built-in switch is also a smart solution for devices with a higher power. With a maximum load of no less than 2000 Watts, you can connect practically any appliance in your home to the build-in switch. Combine the build-in switch with up to 32 Trust Switch-in transmitters and experience the comfort of wireless switching throughout your home!

From clever solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you're on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

Specifications

Total weight	84 g
Weight of main unit	20 g
Height of main product (in mm)	25 mm
Width of main product (in mm)	48 mm
