GTIN: 08713439712704

Core content

Brand	Trust Smart Home
Product line	Start line
Product type	Plug-in doorbel
Colour	White
Plug country code	ML
Key features	- Can be placed in any socket (indoors) - Can be combined with one or more Trust Smart Home push buttons - Six melodies and four volume levels - It is possible to select a different tone per push button (when using multiple Trust Smart Home push buttons) - The LED indication clearly indicates when the bell rings
Package contents	- Plug-in wireless doorbell - Manual
System requirements	- Trust Smart Home transmitters (tip: combine with the wireless push button)

Marketing

Extended retailer text	Get more out of your doorbell with this plug-in wireless doorbell from Trust Switch-in. Place the doorbell in any socket in your house and combine it with a wireless push button to complete your doorbell system.
-------------------------------	---

The doorbell gives you the choice of six melodies and four volume levels and even offers the possibility to link other Trust Switch-in transmitters, such as the motion sensor. This way, the doorbell can give you a warning when someone uninvited walks into your garden.

Do you want to provide several doors with a doorbell? No problem, you can effortlessly link several push buttons to your doorbell and provide them with a melody of your choice.

- Can be placed in any socket (indoors)
- Integrated indicator LEDs to show that the push button is being pressed/the bell is ringing
- Choice of six selectable melodies and four volume levels
- Can be combined with one or more Trust Switch-in push buttons
- It is possible to choose a different tone for each push button (when using multiple push buttons)
- Get a notification on your smartphone (in the free Trust Switch-in app) when the bell rings or turn off the doorbell when it's evening/nighttime (in combination with the Smart Bridge)

Are you looking for a doorbell that can be heard everywhere in the house (or even in the garage or shed), then this wireless doorbell of Trust Switch-in is the solution. The plug-in doorbell can be placed anywhere in the house so that you can always hear the bell and therefore do not miss any visitor.

Superfast installation

Installing this doorbell is very easy. Plug the plug-in doorbell into a wall socket and then stick or screw the waterproof push button (sold separately) anywhere you want, for example at the front door. Put the doorbell in learning mode with one push of the button, press the push button and your set is ready for use. Would you like to adjust a melody or the volume of the wireless doorbell? That's also very easy to do with the buttons on the side.

Expand your smart doorbell system

Expand your doorbell as desired with multiple push buttons or doorbells. This is ideal if you live in a large house or if you want to provide several doors with a push button. When using several push buttons, you can choose to give each push button a different melody. Handy, because then you always know which door you need to be at.

It is also possible to connect other transmitters of Trust Switch-in, for example an outdoor motion sensor, to make your doorbell ring when someone walks into the backyard.

Turn your wireless doorbell into a smart doorbell

Make your wireless doorbell smart with the help of the Smart Bridge. By connecting your bell to this station you will receive a notification on your phone (in the free Trust Switch-in Smart Home app) when the bell rings and you can choose to turn off the sound of the bell at certain times. Ideal when children are sleeping at night.

More than just sound

The plug-in wireless doorbell is equipped with an LED indicator light. This means that you are always aware when someone is at the door, even if you are hard of hearing or you are vacuuming, for example.

Specifications

Total weight	138 g
Weight of main unit	80 g
