### Marketing

<b>Extended retailer text</b>	<p>Get more out of your doorbell! Combine your existing doorbell pusher with the convenience of a wireless doorbell from Trust Switch-in.</p> <p>Just connect the included transmitter to your existing doorbell push button, place the wireless doorbell in any desired location in your house and choose one of the many melodies.</p>
-------------------------------	--

---

It is even possible to connect other Trust Switch-in transmitters, such as the motion sensor, to your doorbell to give a warning when someone uninvited walks into the garden.

- Ready-to-use set of a plug-in wireless doorbell and transmitter
- You can keep your existing bell push with this built-in transmitter
- Please note! If you want to continue using your existing bell, you also need the universal switch AMU-500.
- Choose from six selectable melodies and four volume levels.
- Get a notification on your smartphone (in the free Trust Switch-in app) when the bell rings or turn off the doorbell when it's evening/nighttime (in combination with the Smart Bridge)

If you are looking for a doorbell that can be heard everywhere in your house (or even in the garage or shed), then this wireless doorbell set from Trust Switch-in is the solution. The plug-in doorbell can be placed in any socket in your house, so you will always hear the bell and will not miss any visitor.

#### Super-fast installation

Installing this doorbell set is very easy. Just connect the transmitter to your existing bell push. You can usually do this in the meter cupboard, so that the transmitter is not directly in sight. Then place the plug-in doorbell in any socket and put the doorbell in the learning mode with one push of the button. Press your bell push and your set is ready for use. Would you like to adjust a melody or the volume of the wireless doorbell? This is also very easy to do with the buttons on the side of the wireless doorbell.

#### Expand your smart doorbell system

Expand your doorbell set as desired with several push buttons or doorbells. This is ideal if you live in a large house or if you want to equip several doors with a push button. When using several push buttons, you can choose to give each push button a different melody. Handy, because then you always know which door you need to be at. It is also possible to connect other transmitters of Trust Switch-in, for example an outdoor motion sensor, to make your doorbell ring when someone walks into the backyard.

#### Turn your wireless doorbell into a smart doorbell

Make your wireless doorbell smart with the Smart Bridge. By connecting your bell to the Smart Bridge you will receive a notification on your phone (in the free Trust Switch-in app) when the bell rings and you can choose to turn off the sound of the bell at certain times. Ideal when children are sleeping at night.

#### More than just sound

The wireless doorbell is equipped with an LED indicator light. This way, you are always aware when someone is at the door, even if you are hard of hearing.

#### From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

## Specifications

<b>Total weight</b>	200 g
<b>Weight of main unit</b>	139 g
