Core content

Brand	Trust Smart Home
Product line	Start line
Product type	Portable wireless doorbell set
Colour	White
Plug country code	ML
Key features	- It is possible to choose a different tone per push button (when using multiple push buttons) - Indicates with LED indication when the battery is almost empty - Integrated LEDs to notify you when the push button is pressed/bell is ringing Portable wireless doorbell - Works on batteries - Can be combined with one or more Trust Smart Home push buttons - Six melodies and four volume levels Wireless push button - Transmission range of up to 150 meters - Rain resistant (IP55)
Package contents	- Portable wireless doorbell - Wireless push button - Battery (CR2032) - Double sided tape and screws - Manual
System requirements	- 2x AA batteries (not included)

Marketing

Extended retailer text	Get more out of your doorbell with this portable wireless doorbell set from Trust Switch-in. Place the doorbell anywhere in your home, simply stick or screw the push-button next to the door, and choose one of the six

melodies. It is even possible to link other Trust Switch-in transmitters, such as the motion sensor, in order to have your doorbell give a warning if someone uninvited walks into the garden.

Would you like to equip multiple doors with a doorbell? No problem, you can effortlessly link several push buttons to your doorbell and provide them with a melody of your choice.

- Ready-made set of a wireless push button and portable doorbell
- Integrated indicator LEDs to show that the push button is being pressed/the bell is ringing
- Choice of six selectable melodies and four volume level
- Different tone can be chosen per push button (when using multiple push buttons)
- Indicates when the battery is low via an LED
- Receive a notification on your smartphone (in the free Trust Switch-in Smart Home app) when the doorbell rings or switch the doorbell off when it is evening/nighttime (in combination with the Smart Bridge)

Are you looking for a doorbell that can be heard everywhere in your house (or even in the garage or shed), then this portable doorbell set from Trust Switch-in is the solution. The portable doorbell can be placed anywhere in the house, so that you can always hear the bell and will not miss a single visitor. And if you're outside more often in the summer, just take this bell into the garden.

Portable wireless doorbell

- Battery operated (not included); can be placed anywhere
- Can be combined with one or more Trust Switch-in push buttons

Wireless push button

- Transmission range of up to 150 metres
- Rainproof (IP55)
- Works with one button cell battery (included)

Superfast installation

Installing this doorbell set is very easy. Just insert the batteries into the portable doorbell and stick or screw the waterproof push button in any place you like, for example at the front door. Put the doorbell in learning mode with one push of the button, press the push button and your set is ready to use. Would you like to adjust a melody or the volume of the wireless doorbell? That's also very easy to do with the buttons on the side.

Expand your smart doorbell system

Expand your doorbell set with multiple push buttons or doorbells. This is ideal if you live in a large house or if you want to equip several doors with a push button. When using several push buttons, you can choose to give each push button a different melody. Handy, because then you always know which door you need to be at.

It is also possible to connect other transmitters of Trust Switch-in, for example an outdoor motion sensor, to make your doorbell ring when someone walks into the backyard.

Turn your wireless doorbell into a smart doorbell

Make your wireless doorbell smart with the help of the Smart Bridge. By connecting your bell to this station you will receive a notification on your phone (in the free Trust Switch-in Smart Home app) when the bell rings and you can choose to turn off the sound of the bell at certain times. Ideal when children are sleeping at night.

More than just sound

Both the wireless doorbell and the push button are equipped with a LED indicator light. In this way, the person who presses the button knows for sure that he/she has rung the bell and you are always informed when someone is at the door, even if you are hard of hearing or, for example, vacuuming.

Specifications

Total weight	212 g
Weight of main unit	144 g
Height of main product (in mm)	54 mm
