Wireless push button with LED indication for operating all doorbells from Trust Switch-in

Article number: 71276
Barcode: 8713439712766
GTIN: 08713439712766

Core content

Brand	Trust Smart Home
Product line	Start line
Product type	Wireless push button
Colour	Black
Plug country code	ML
Key features	- Transmission range of up to 150 meters - Rain resistant (IP55) - The LED indication indicates when the bell is pressed - It is possible to choose a different tone per push button (when using multiple Trust Smart Home push buttons) - Indicates with LED indication when the battery is almost empty
Package contents	- Wireless push button (black) - Battery (CR2032) - Double sided tape and screws - Manual
System requirements	- Trust Smart Home doorbells (plug-in wireless doorbell and/or portable wireless doorbell)

Marketing

Extended retailer text	Get more out of your doorbell with this wireless push button from Trust Switch-in. Stick or screw this bell push button at any desired location at the door and combine it with one of the wireless doorbells of Trust Switch-in to complete your doorbell system.

You can connect as many push buttons and doorbells as you want and it is even possible to set a different melody per push button (if you use a Trust Switch-in doorbell).

- Combine with a (portable or plug-in) Trust Switch-in doorbell
- Transmission range of up to 150 metres
- Rainproof (IP55)
- Operates on a cell battery (included)
- Per push button another tone can be chosen (when using multiple push buttons in combination with a wireless doorbell)

Are you looking for a wireless and smart doorbell? Then this wireless push button by Trust Switch-in is the solution. Unlike ordinary doorbell pushers, this button can be placed anywhere and you don't need to connect anything. Combine the push button with a portable or plug-in doorbell and you have a doorbell system that can be heard anywhere in the house (or even in the shed, garage or garden).

Super-fast installation
Installing the push button is very easy. Simply stick or screw the waterproof push button in any place, for example at the front door, and set the wireless doorbell (sold separately) into learning mode with one push of a button. Press the push button and your doorbell system is ready to use. You can then choose from several melodies and volume levels via the doorbell.

Expand
Expand your doorbell system as desired with multiple push buttons or doorbells. This is ideal if you live in a large house or if you want to equip several doors with a push button. When using several push buttons, you can choose to give each push button a different melody. Handy, because then you always know which door you need to be at.

It is also possible to connect other transmitters of Trust Switch-in, for example an outdoor motion sensor, to make your doorbell ring when someone walks into the backyard.

Turn your wireless push button into a smart bell
Make your push button smart with the help of the Smart Bridge. By connecting your push button to this station you will receive a notification on your phone (in the free Trust Switch-in app) when the push button is pressed.
Note: if you also want to hear the sound of a bell, you will need a wireless doorbell.
If you use this, you can also choose to turn off the sound of the bell at certain times. Ideal if there are children sleeping at night.

Certain of your case
The wireless push button is equipped with a LED indicator light. In this way, the person who presses the button knows for sure that he/she has rang the bell. The LED also indicates by flashing when the battery is about to run out.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in devices to the Bridge and control everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on vacation and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

Specifications

Total weight	69 g
Weight of main unit	28 g
