System requirements	- Smartphone with iOS (10.0 or higher) or Android (5.0 or higher) - WiFi 2.4GHz connection

Marketing

Extended retailer text	Experience the convenience of wireless control! With the smart WiFi sockets from Trust Smart Home WiFi you can switch and automate all your lighting and devices with your smartphone.
-------------------------------	--

All you need is WiFi!

Do you have WiFi? Then you also have access to smart control. With the smart plugs from Trust Smart Home WiFi, you can now operate your floor lamps, desk lamps or other corded devices up to 3000 Watt with your smartphone, wherever you are.

Add your socket(s) to the free Trust Smart Home WiFi app and use your phone or tablet as a remote control, without the use of an expensive hub. All you need is an internet connection. Switching to smart lighting has never been easier!

All smart options at your fingertips.

With Trust WiFi you bring a lot of convenience into your home. You can not only control your lights with your smartphone, but also automate it in the free app. With the timer settings you can switch all smart lights and devices at a fixed time.

Smart scenarios

Thanks to the app's "smart scenarios", it is possible to create your own scenes and automate your sockets as desired using timers and conditions. For example, you can use your location or the weather to control your sockets. This way, for example, your lighting will switch on when you are almost home or as soon as the sun sets.

Talk to your system.

"Hey Google, turn on the kitchen light", "Alexa, dim all the lights". If you have a Google Nest or an Amazon speaker, you can also control all your lights and devices with simple voice commands.

Expand easily

Get even more out of your smart lighting with the smart WiFi LED lights from Trust Smart Home. Just like the smart plug, you can add them to the app in an instant and make it possible to operate your pendant lamps, ceiling lights or other lighting with your smartphone.
