<b>Extended retailer text</b>	<p>Control your (existing) lights and devices via Matter apps, such as Google Home and Apple Home. You can also operate this switch with Trust Smart Home transmitters and existing (wired) wall switches remain functional. For full control over your lights and devices.</p> <ul style="list-style-type: none"> <li>▪ Works with apps that support Matter, including Google Home and Apple Home/Home</li> </ul>
-------------------------------	--

- No Smart Bridge or ICS-2000 required. Does require a device that can be used as a Matter bridge (such as an Apple HomePod or Google Nest speaker)
- Also works with Trust Smart Home transmitters, such as remote controls and wireless wall switches)
- Existing (wired) wall switches continue to work (also in a hotel switch, e.g. at the top and bottom of a staircase)

With the Matter recessed switch, you control (existing) lights and appliances via various Matter platforms, such as Google Home and the Apple Home app. In addition, you can also operate the switch with one or more Trust Smart Home transmitters of your choice, while existing wall switches continue to do their job.

The Matter protocol is the latest standard within Smart Home that allows smart devices of different brands to communicate with each other. So in apps that support Matter (think Google Home, Apple Home), you can add Matter smart devices and have them work together.

- Works with apps that support Matter, including Google Home and Apple Home/Home
- No Smart Bridge or ICS-2000 required. Does require a device that can be used as a Matter bridge (such as an Apple HomePod or Google Nest speaker)
- Also works with Trust Smart Home transmitters, such as remote controls and wireless wall switches
- Existing (wired) wall switches continue to work (also in a hotel switch, e.g. at the top and bottom of a staircase)
- Suitable for all types of lighting: LED, incandescent, halogen lamps and appliances up to 1800 W
- Compact design; easy to mount 'invisibly' in the ceiling or junction box
- Voice control via Siri and Google Assistant
- Compact design; 'invisible' mounting in ceiling or junction box

Make all your lamps and appliances smart!

This built-in module makes your lamps and appliances smart. By connecting the module to a lamp, fan or other device, for example, you can now control it via your smartphone. If you use the module for lighting, you can continue to use your existing light sources. The module is suitable for lamps and devices up to 1800 Watt and allows you to control them with Matter apps as well as Trust Smart Home transmitters.

Choose your favourite app

If you use Google Home or have the Apple Home app installed on your smartphone, you can easily add

---

this module to your favourite app. So you are not stuck with one specific app or brand, but can choose the one that best suits your needs. In this app, you can then switch, automate and even make your lights work together with other devices in the app.

#### Add Trust Smart Home transmitters

Just like the traditional Start-line devices, this Matter built-in module can also be controlled with all Trust Smart Home transmitters. So you can very easily link one or more wireless wall switches or remote controls to expand your control options. The use of transmitters does not affect the control via the Matter app you use.

If you turn off a lamp or device with a wall switch, for example, the status in the app will adjust automatically.

#### Keep your existing wall switches

When using the recessed switch, your existing wall switches continue to do their job. So you can still switch your lights or appliances on and off with the wall switches. You can connect up to two existing wall switches, so hotel switching is no problem for the Matter module either.

#### Do you already have a Matter hub?

To use Matter, you need a Matter hub. This is a device that acts as a central connection between your Matter devices and your network.

Fortunately, there are a lot of devices that can serve as hubs. Google, Apple and Samsung, among others, have several devices that can do this.

#### Some common Matter hubs:

- Google Nest Hub (2nd generation)
- Google Nest Hub Max
- Google Nest WiFi Pro
- Apple HomePod (2nd generation)
- Apple HomePod mini
- Apple TV 4K WiFi + Ethernet
- Samsung SmartThings Station
