Extended retailer text	<p>Control your lamps with a plug via Matter apps, such as Google Home and Apple Home. In addition, you can also control this plug-in dimmer with Trust Smart Home transmitters. For full control over your lighting.</p> <ul style="list-style-type: none"> ▪ Works with Matter-enabled apps, including Google Home and Apple Home/Home.
-------------------------------	--

- No Smart Bridge or ICS-2000 required. Do need a device that can be used as a Matter bridge (such as an Apple HomePod or Google Nest speaker).
- Also works with Trust Smart Home transmitters, such as remote controls and wireless wall switches

Thanks to the Matter plug-in dimmer, you control all your lights with a plug via Matter platforms like Google Home and the Apple Home app. In addition, you can also control this dimmer with one or more Trust Smart Home transmitters of your choice.

The Matter protocol is the latest standard within Smart Home that allows smart devices from different brands to communicate with each other. So in apps that support Matter (think Google Home, Apple Home), you can add Matter smart devices and make them work together.

- Works with apps that support Matter, including Google Home and Apple Home/Home.
- No Smart Bridge or ICS-2000 required. But a device that can be used as a Matter bridge (such as an Apple HomePod or Google Nest speaker).
- Also works with Trust Smart Home transmitters, such as remote controls and wireless wall switches
- Dims LED up to 100 watts, halogen lighting up to 200 watts
- Suitable for all types of dimmable (LED) lighting due to three special dimming modes
- Dimming memory: remembers the last dimming setting
- High performance; dims LED from 3-100W, halogen lighting up to 250W
- Voice control via Siri and Google assistant
- Equipped with child protection

Make all your lamps smart!

The plug dimmer makes any floor, table or desk lamp smart. Plug the plug dimmer into the wall socket, then insert the plug of your lamp and very easily add the plug to a Matter app like Google Home or Apple Home. In addition to control via Matter platforms, the plug can also be controlled with Trust Smart Home transmitters.

Choose your favourite app

If you use Google Home or have the Apple Home app installed on your smartphone, you can effortlessly add this plug dimmer to your favourite app. So you are not stuck with one specific app or brand, but can choose the one that best suits your needs. In this app, you can then switch, dim, automate and even make your lights work together with other devices in the app.

Add Trust Smart Home transmitters

Like traditional Start-line devices, the Matter plug-in dimmer can also be controlled with Trust Smart Home transmitters. You can thus very easily link one or more wireless wall switches, wireless rotary knobs or remote controls to expand your control options. Using transmitters is not at the expense of controlling via the Matter app you use.

If you turn the lamp off or dim it with a wall switch, for example, the status of your lamp will automatically adjust in the app.

Do you already have a Matter hub?

To use Matter, you need a Matter hub. This is a device that acts as a central connection between your Matter devices and your network. Fortunately, there are a lot of devices that can serve as hubs. Google, Apple and Samsung, among others, have several devices that can do this.

Some common Matter hubs:

- Google Nest Hub (2nd generation)
- Google Nest Hub Max
- Google Nest WiFi Pro
- Apple HomePod (2nd generation)
- Apple HomePod mini
- Apple TV 4K WiFi + Ethernet
- Samsung SmartThings Station
