Package contents	- Build-in switch - Manual
System requirements	- Trust Smart Home transmitter, such as a remote control or wireless wall switch

Marketing

Extended retailer text	<p>Make pendant, wall and ceiling lights remotely controllable. This compact build-in switch can be easily concealed in, for example, the ceiling box of your light and allows you to control your light with a remote control, wireless wall switch and even your smartphone (in combination with the Smart Bridge).</p>
-------------------------------	---

- Easy to install in a ceiling box, junction box or cabinet
- Works with all lamps and devices up to 2000 watts
- The ideal solution for wireless control of pendant lamps, ceiling lamps and wall lamps
- Combine with the transmitter that suits your living situation: remote controls, wireless wall switches and motion or contact sensors
- Connect the build-in switch to the Smart Bridge and control and automate the switch with your smartphone
- Please note: the ACM-2000 switch does not work with existing wall switches. Use the ACM-2300-HC switch or the ACM-250-LD dimmer if you also want to continue using your existing switches/dimmers

With the ACM-2000 flush-mounted switch, you can easily switch lighting or other devices wirelessly. Install the switch in a ceiling cap, junction box or cabinet and then combine it with one of the Trust Smart Home transmitters, such as a wireless wall switch, remote control or even the app.

Optimal control in your home

The ACM-2000 allows you to remotely control all your lighting, from wall lamps to the lamp above the dining table. But the flush-mounted switch is also a smart solution for appliances with a higher power rating. Thanks to a maximum load of no less than 2000 watts, virtually all appliances in your home can be connected to the flush-mounted switch.

Combine the flush-mounted switch with up to 32 transmitters and experience the convenience of wireless switching anywhere in your home!

Combine for more

The ACM-2000 can be connected to any Trust Smart Home transmitter, such as the AYCT-102 remote control, the ATMT-502 remote control with timer or the AWST-6000 motion sensor. Want to go one step further? Use the Smart Bridge and switch to the free app to operate the switch with your phone or tablet, wherever you are.

From smart solutions to a Smart Home

With the Smart Bridge, you lay the foundation for your smart home. Connect all your Trust Smart Home products to the Bridge and control everything – from lighting to electric curtains – with your smartphone or tablet. Or set timers, rules and scenes as desired to fully automate your system. For example, the lights will turn on in the evening when you are on holiday and the boiler will be switched off if the CO detector detects a carbon monoxide leak.
