- Save energy: lights and appliances can be automatically switched off after 5 or 30 seconds, 2, 10 or 30 minutes, or 1 or 3 hours
- Battery operated (average battery life 3 years)
- Transmission range up to 30 meters

Switch to wireless control

With the AWST-8900 wireless wall switch, you can easily switch your Trust Smart Home receivers on or off. The switch can be placed anywhere in the house, without the hassle of wires or high voltage. The transmitter is battery-powered. With one push of a button, you can now control your home wirelessly!

Extensive possibilities

With the AWST-8900, you can always switch your Trust Smart Home receivers from the perfect location in your home, because you can determine that yourself. For example, you can easily control your lighting, electrical equipment, roller shutters, and sun blinds. With the included mounting materials, you can place the switch in the ideal location in your home. This means that even after a renovation, for example, your switch will still be in the right place.

Combine for more

The wireless single-pole wall switch also has the option of automatically switching off lighting or equipment thanks to an adjustable switch-off function. For example, you can automatically switch off a fan after 5 or 30 seconds, 2, 10 or 30 minutes, or after 1 or 3 hours. Ideal for switching off an extraction system, for example.

Long range

The signal from the wall switch passes through walls, windows, and doors and has an indoor range of up to 30 meters. This, combined with the long battery life, makes this wall switch suitable for any home.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Connect all your products to the Bridge and control everything—from lighting to electric curtains—with your smartphone or tablet. Or set timers, rules, and scenes as desired to fully automate your system. For example, the lights will turn on in the evening when you are on vacation, and the boiler will be turned off if the CO detector detects a carbon monoxide leak.
