Key features	<ul style="list-style-type: none"> - Can be placed in any outdoor mains socket - Works with all lights/devices up to 3500 Watt - Splash proof (IP44) - Child protection - Transmission range up to 30 meters - The remote can operate up to 4 individual lamps and/or devices - Control multiple lights and/or devices with one button - Long battery life (battery included)
Package contents	- 2x Wireless outdoor power plug - Remote - Battery (CR2032) - Manual

Marketing

Extended retailer text	<p>Control your garden lighting and appliances from a distance with this smart socket set. Ideal for hot days when you want to lie back in your armchair, or if you prefer to stay inside to switch on the garden lights in the evening. The plugs are water-resistant and effortlessly withstand rain and cold. And with the included remote control, you always have a switch close at hand.</p> <ul style="list-style-type: none"> - For everything with a plug: from garden lighting to pond pump - 32 channels: link up to 32 transmitters, such as a wireless wall switch, remote control or motion sensor
-------------------------------	--

- Outdoor transmission range: 70 metres
- IP44: suitable for outdoor use
- Up to 3500W: suitable for all appliances and lights with a plug
- Includes button cell battery for the remote control
- Equipped with a new chip: no problems with switching when the plugs are placed directly next to each other
- Immediately ready for use

The splashproof socket switches are suitable for every socket in the garden or on the balcony. Plug them into the outlet and you are ready to operate any wired light or device remotely.

Use the supplied remote control or one of the many wireless Trust Smart Home transmitters - such as a waterproof wall switch or an outdoor motion detector - to switch the plugs on and off. It is also possible to connect multiple transmitters to the plugs to control your lighting or appliances from multiple locations.

Thanks to the maximum load of 3500 Watt, there is no appliance or lamp that you cannot operate wirelessly.

More compact design

The new socket switches are a lot more compact than their predecessors, without compromising on quality. The plugs have a size of only 8.0 x 5.1 x 6.0 cm and are equipped with a cover that closes the plug when not in use. The range of the plugs is 70 metres, so that they can be used effortlessly in every garden.

Expand your smart system easily

Would you like to add more plugs or, in addition to the remote control, would you like to operate it with a wireless wall switch or outdoor motion sensor? No problem. You can add more transmitters to the plugs. For example, you can automatically switch on the light when you enter the garden.

Need more plugs? That is also possible. Add several plugs to the set and choose, for example, to operate several plugs with one button. The choice is yours!

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Smart Home products to the Smart Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you're on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
