

## Trust Smart Home AEX-701 Wireless signal repeater - White DE

Extends wireless transmission range of the transmitter up to 30 meters

Article number: 78029

Barcode: 8713439780291

GTIN: 08713439780291

### Core content

<b>Brand</b>	Trust Smart Home
<b>Product line</b>	Start line
<b>Product type</b>	Wireless signal repeater
<b>Colour</b>	White
<b>Plug country code</b>	DE
<b>Key features</b>	- Can be placed anywhere indoor and outdoor - Can extend the range of up to 6 transmission codes - Long battery life (battery not included)
<b>Package contents</b>	- Wireless signal repeater - Manual
<b>System requirements</b>	- Two AA alkaline batteries - Trust Smart Home transmitter - Trust Smart Home receiver

- Works on batteries

The AEX-701 wireless signal amplifier or repeater repeats the signal of a Trust Switch-in transmitter, allowing you to increase the transmission range by up to 30 metres. Ideal to reach a receiver located at the back of the garden. You can place the amplifier anywhere, both indoors and outdoors (IP56), without the hassle of installation wires. This is because the transmitter works on batteries.

If you notice that a certain transmission code of, for example, your Trust Switch-in remote control does not always control the linked receiver then you can use this signal amplifier to ensure that the receiver can be operated as desired. You report the relevant transmission code of the remote control to the signal amplifier. Every time you send the corresponding on or off signal with the remote control, the signal amplifier will pick up this transmission code and send it again.

In total, you can register up to six transmit codes per AEX-701 signal amplifier. If you want to repeat more than six transmit codes, you need to choose multiple repeaters. It is not possible to register one transmit code with multiple repeaters.

The AEX-701 can be combined with all Trust Switch-in transmitters with the automatic code system (product code starts with an A, like AYCT-102, ATMT-502, etc.). This way you can also increase the transmission range of the Smart Bridge . This transmitter uses radio frequency 433.92 Mhz technology. The signal passes through walls, windows and doors, with a range of up to 30 metres.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in products to the Smart Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the lights go on at night when you're on holiday and the boiler is switched off when the CO detector detects a carbon monoxide leak.

## Specifications

**Total weight** 172 g

**Weight of main unit** 91 g

**Height of main product (in mm)** 100 mm

**Width of main product (in mm)** 100 mm

**Depth of main product (in mm)** 38 mm
