System requirements	- Trust Smart Home receiver

Marketing

Extended retailer text	Control your lights and appliances remotely and automate them using one or more timers. The timer remote control can be combined with multiple Trust Switch-in receivers, such as a built-in switch, dimmer or smart plug.

- Control up to 16 individual lamps and devices

- Set up to 12 timers to automatically turn lights and appliances on and off

- Set any timer to turn lights and appliances on and off at specific times (to make it seem like you are at home)

- Control multiple lamps and devices with one button

- Operates on one battery (average life of 3 years)

- Transmission range up to 30 meters

Bring the right atmosphere into your home with just one push of a button! With the ATMT-502 remote control you can switch and dim for the perfect setting of your lights and devices.

Automatic control

With the ATMT-502 remote control you can both manually and automatically control your lighting, electrical appliances, blinds and shutters. This remote control can be combined with all Trust Switch-in build-in modules and plugs (except the ZYCT-202 wall switch).

Simple operation

You can operate a total of 16 Trust Switch-in receivers separately from each other or operate multiple receivers simultaneously per channel. For example, you can switch on the lighting in your living room at dusk with one press of a button.

Switched on time

The remote control with timer has 12 timer programs. For each timer program, an on and off time must be set. Per program there are 3 different switching modes: daily, one-time or switching at a set time. This last mode is ideal for simulating that you are at home. The lighting is namely between the times you specify on and off. This will deter unwanted visitors and you will leave home with an easy mind.

Large range

The signal of the remote control passes through walls, windows and doors and has a range of up to 30 meters indoors. This in combination with the long battery life makes this remote control suitable for every home!

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in devices to the Bridge and control everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on vacation and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
