### Marketing

<b>Extended retailer text</b>	Control everything with a plug remotely. This socket set with 3 plugs is the perfect way to get acquainted with smart control by Trust Switch-in.
-------------------------------	---

---

Just plug the smart plug into the socket, insert the plug of your lamp or appliance and you are ready to operate remotely.

- Compact plugs: possible to place right next to each other
- Suitable for all lamps and appliances up to 2300 Watts
- Connection with child safety shutters
- Operate multiple lamps/appliances with one button
- Transmission range up to 30 metres
- Expandable with multiple receivers, such as additional socket switches or dimmers
- Expandable with multiple transmitters, such as a wireless wall switch, movement sensor or contact sensor
- The battery of the remote control lasts approximately 3 years

Become acquainted with wireless control!

The smart socket set is the ideal way to become acquainted with wireless operation and a smart home. The set consists of 3 compact socket switches that you can easily operate at a distance with the supplied remote control. In this way you can operate three separate devices or lights with a plug very easily from the couch, your lazy chair or from your bed.

A wireless solution

Why control every light in your home manually when you can do it from the comfort of your couch with just one push of a button. With the supplied remote control you can operate all your lamps and devices that are connected to a plug. The power is in your hands! Don't waste time or energy operating your lights, especially if you have limited mobility. The switches work with all lamps and other devices up to 2300 Watts.

Compact design

Due to the compact design of the plugs, they can be placed in any (indoor) power outlet without blocking adjacent outlets. This means that you can always use several switches next to each other.

In addition, the plugs are equipped with child safety shutters so that they can be used safely throughout the house.

A smart backyard

Trust Switch-in also has a smart socket set for your garden or balcony: the AGC2-3500R outdoor socket set. So from now on you also control all your outdoor lighting and appliances with a remote. Ideal if you prefer to stay inside to switch on the garden lights in the winter or on a rainy day.

Expand your smart system easily.

Would you like to add more socket switches or do you want to operate these with a wireless wall switch, movement sensor or smartphone in addition to the remote control? No problem. You can add more transmitters. For example, you can have the light go on automatically the moment you open the closet or climb the stairs.

Need more socket switches? That is also possible. Add several switches to the set and choose, for example, to operate several plugs with one button. The choice is yours!

From smart solutions to a Smart Home

---

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the lights go on at night when you're on holiday and the boiler is switched off when the CO detector detects a carbon monoxide leak.
