System requirements	- Trust Smart Home bridge/control station (e.g. Z1 ZigBee Bridge or ICS-2000)

Marketing

Extended retailer text	Always informed, everywhere
-------------------------------	-----------------------------

Always feel safe, even when you're not at home. You can set the smoke detector to receive push notifications on your smartphone when the alarm goes off or when the batteries are running low. This way you are always smartly protected, wherever you are!

Smoke detected, lights on!

If you use the smart smoke detector with other Trust Switch-in devices, it is possible to give your notification a smart consequence. For example, connect your lights to built-in receivers and turn the lights on automatically. This way you add extra safety to your home or office and you can concentrate on what is important at that moment.

Super-fast installation

The smart smoke detector is very easy to install. Download and install the app and pair the smoke detector. Select a room in the app, select the Smoke Detector and follow the instructions. Then simply mount the smoke detector in the desired location using the supplied bracket.

From clever solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you're on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

Specifications

Weight of main unit	70 g
Height of main product (in mm)	60 mm
Width of main product (in mm)	60 mm
Depth of main product (in mm)	49 mm
Application	Home Indoor
Anti tamper system	no
Automatic OFF signal	no
Detector type	photo electrical
Sensor type	smoke
