Extended retailer text

Dim and control your corded desk lamp, floor lamp or other lighting remotely.

With this smart socket dimmer set you control two lamps wirelessly with the supplied remote control. The smart socket dimmers are suitable for all types of dimmable lamps, from LED (max. 50W) to halogen and incandescent lamps (max. 250W).

- The best solution for wireless dimming of dimmable LED lights (3 to 50W)
- Also supports incandescent and halogen lighting (up to 250W)
- Two separate dimming modes for optimal dimming performance: phase on and phase off
- Compact design: fits into any power outlet
- Easily expandable with more Trust Switch-in transmitters, such as an extra remote control, wall switch or motion sensor
- Can also be controlled with the Trust Switch-in app (in combination with the Smart Bridge)
- With ON/OFF button on plugs for manual control
- Connection with child protection
- Control up to 16 separate lamps and devices
- Control multiple lamps and devices with one button
- Transmission range up to 30 metres

The ACC-250R socket dimmers are designed to make life a little easier. Just plug the compact plugs into the socket, connect your lamps and control and dim them from the comfort of your sofa. Adjacent sockets remain accessible.

The perfect dimming setting

These socket dimmers allow you to dim LED lights up to 50 Watt and light bulbs and halogen lights up to 250 Watt wirelessly. You can choose between two different dimming modes - phase on and phase off - so you can select the mode that is most appropriate for your dimmable lamps. This prevents them from blinking or flickering. Good quality dimmable bulbs are recommended to ensure optimal dimming performance. This way you can enjoy just the right light in your home.

Connecting and operating

You can operate the plug dimmers wirelessly by combining them with the included remote control and/or one or more other transmitters from Trust Switch-in. The socket dimmers can be connected to no less than 32 transmitters. Connect them, for example, to a wireless wall switch or a door or motion sensor, so that your lighting switches on automatically when you walk into the dark attic or open the hallway closet.

Your smart home at your fingertips

Looking for even more? Connect the compact dimmer switches to the free Trust Switch-in app using the Smart Bridge and you can dim your lights from your phone or tablet, wherever you are.

Smart and safe design

Thanks to the child safety shutters, the socket dimmers are safe to use in a household with children. You can also

operate these switches manually: switch the lights on and off by pressing the ON/OFF button on the housing. Thanks to the 30-metre indoor wireless range, the switch can be used anywhere in the house. Enjoy the convenience and comfort of wireless dimming!

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
