|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Extended retailer text</b> | <p>The easiest way to dim</p> <p>Looking for a wireless rotary switch to dim your lights from anywhere? With the AWRT-1000 you can switch and dim your lights anywhere in your home. The wireless rotary switch works with all Trust Switch-in dimmers, such as the ACM-250-LD build-in LED dimmer and the ACC-250-LD socket dimmer. From now on it is possible to dim hanging lamps, ceiling lamps and wired lamps - for example desk lamps - wirelessly.</p> <p>Remember your dimmer setting</p> |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

The dimmers of Trust Switch-in make use of dim memory. If you switch a lamp off and on again, it will immediately switch to the old dimming setting. This way you don't have to set your ideal dimmer setting over and over again.

From clever solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home (and garden). Link all your Trust Switch-in products to the Bridge and operate everything - from lighting to electric curtains - using your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you're on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

## Specifications

|                                |                    |
|--------------------------------|--------------------|
| Weight of main unit            | 60 g               |
| Height of main product (in mm) | 25 mm              |
| Width of main product (in mm)  | 80 mm              |
| Depth of main product (in mm)  | 80 mm              |
| Controller type                | wall               |
| Controls                       | dim lights on/off  |
