Core content

Brand	Trust Smart Home
Product line	Start line
Product type	Plug-in doorbell set
Colour	White
Plug country code	DE
Key features	- It is possible to choose a different tone per push button (when using multiple push buttons) - Indicates with LED indication when the battery is almost empty - Integrated LEDs to notify you when the push button is pressed/bell is ringing Plug-in wireless doorbell - Can be placed in any socket (indoors) - Can be combined with one or more Trust Smart Home push buttons - Six melodies and four volume levels Wireless push button - Transmission range of up to 150 meters - Rain resistant (IP55)
Package contents	- Plug-in wireless doorbell - Wireless push button - Battery (CR2032) - Double sided tape and screws - Manual

Marketing

Extended retailer text	Get more out of your doorbell with this Trust Switch-in plug-in doorbell set. Place the doorbell in any socket in your house, simply stick or screw the push button next to the door and choose from one of the six melodies. It is even possible to link other Trust Switch-in transmitters, such as the motion sensor, to your doorbell to give a

warning if someone uninvited walks into the garden.

Do you want to provide multiple doors with a doorbell? No problem, you can effortlessly link multiple push buttons to your doorbell and provide them with their own melody of choice.
- Ready-to-use set of a wireless push button and plug-in doorbell
- Integrated indicator LEDs to show that the push button is being pressed/the bell is ringing
- Choice of six selectable melodies and four volume levels
- Per push button it is possible to choose a different tone (when using multiple push buttons)
- Get a notification on your smartphone (in the free Trust Switch-in app) when the bell rings or turn off the doorbell when it's evening/night time (in combination with the Smart Bridge)

If you are looking for a doorbell that can be heard anywhere in your home (or even in the garage or shed), then this wireless doorbell set is the solution. The plug-in doorbell can be placed in any socket in your house, so you will not miss any visitors.

Plug-in wireless doorbell
- Can be placed in any wall socket (indoors)
- Can be combined with one or more Trust Switch-in push buttons

Wireless push button
- Transmission range of up to 150 meters
- Rainproof (IP55)
- Works with one button cell battery (included)
- Indicates when the battery is low via an LED

Super fast installation
Installing this doorbell set is very easy. Plug the plug-in doorbell into the wall socket and stick or screw the waterproof push button in any place you want, for example at the front door. Put the doorbell in learning mode with one push of the button, press the push button and your set is ready to use. Would you like to adjust a melody or the volume of the wireless doorbell? That's also very easy to do with the buttons on the side.

Expand your smart doorbell system
Expand your doorbell set as desired with multiple push buttons or doorbells. This is ideal if you live in a large house or if you want to equip several doors with a push button. When using multiple push buttons, you can choose to give each push button a different melody. Convenient, because then you always know at which door you should be.
It is also possible to connect other Trust Switch-in transmitters, for example an outdoor motion sensor, to make your doorbell ring when someone walks into the backyard.

Turn your wireless doorbell into a smart doorbell
Make your wireless doorbell smart by using the Smart bridge. By connecting your bell to this station you will receive a notification on your phone (in the free app) when the bell rings and you can choose to turn off the sound

of the bell at certain times. Ideal when children are sleeping at night.

More than just sound
Both the wireless doorbell and the push button are equipped with a LED indicator light. In this way, the person who presses the button knows for sure that he/she has rang the bell and you are always informed when someone is at the door, even if you are hard of hearing.

From smart solutions to a Smart Home
With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in devices to the Bridge and control everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on vacation and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.
