Thanks to the Smart Bridge you can make your Trust Switch-in devices smart by connecting them with the free Trust Switch-in Smart Home-app. This way you operate your dimmers with your smartphone or automate your ceiling lamps by adding timers to your build-in dimmers. The Smart Bridge offers space for all your Trust Switch-in devices, which you can divide into different rooms. This way you can easily add all your lights and devices and all the rooms in your house to the app.

The foundation of your Smart Home

Set timers and scenes to fully automate your smart home to your liking or combine different smart devices into a smart rule to make them work together. For example, from now on the lights go on when the smart smoke detector goes off. If you use smart detectors or contact sensors, you will also receive push notifications in case of fire, burglary or a carbon monoxide leak. This way you are immediately informed in case of an emergency and you can immediately take action.

From smart solutions to a Smart Home.

Thanks to the Smart Bridge you make all your Trust Smart Home devices smart by connecting them to the free Trust Smart Home app. So from now on you operate your dimmers with your smartphone or automate your ceiling lights by adding timers to your built-in dimmers. The Smart Bridge offers space for all your Trust Smart Home devices, which you can divide into different rooms. This way you can add all your lights and devices and all the rooms in your house effortlessly in the free app.

Automate your smart home with scenes & rules

Program actions that you can turn on or off at the touch of a button. For example, create a 'relax scene' where the lights in the living room are dimmed 50% and the curtains close automatically. Or use rules to execute actions when triggered. For example, automatically switch off the boiler when the carbon monoxide detector goes off, let the doorbell ring when motion is detected or switch on the light when a window is opened.

Reduce standby consumption

Many appliances in your home are not used for most of the day, but still consume energy because they are constantly on standby.Your smart TV, radio, game computer and even modem can be turned off completely for a large part of the day (especially at night). Set handy timers for your smart plugs in the Trust Switch-in app and switch your standby devices completely off at fixed times. That way you can save more than 100 euros per year. Your Smart Bridge will earn itself back in no time.

Anywhere at home

Wherever you are, the Trust Smart Home app gives you access to your smart home. This way you can remotely switch off the lights when you forgot to turn them off. Or turn your lights on at night from your vacation address to scare away unwanted visitors. Of course you can easily automate this using timers. So you can go out with an easy mind.

Smart protection in case of fire and a carbon monoxide leak

Secure your home with smart smoke detectors, carbon monoxide detectors and smart sensors from Trust Switch-in and you will receive a push notification on your smartphone in case of emergency. This way you are always immediately informed and can take action quickly to prevent worse. Want to go one step further? Then combine your security devices with other Trust Switch-in devices – such as smart plugs – and give your notification a smart consequence. For example, you turn on all the lights when the smoke detector goes off or you switch off the boiler when the carbon monoxide detector detects a dangerous concentration of carbon monoxide.Secure your home with smart smoke detectors, carbon monoxide detectors and smart sensors and you will receive a push notification on your smartphone in case of emergency. This way you are always directly informed and can take
