### Marketing

<b>Extended retailer text</b>	Wireless single/double wall switch for wireless control of one or more lamps and/or devices. - Interchangeable push buttons: choose a single or double wall switch - Compact and modern design
-------------------------------	--

- Can be placed anywhere
- Save energy thanks to the adjustable switch-off time

A single and double wall switch in one! The AWST-9000 looks like a normal wall switch, but has the advantage that the control buttons are replaceable. This way, you can decide whether you want to use the AWST-9000 as a single or double switch. This switch can also be placed anywhere in the house without the hassle of wires or high voltage. This transmitter runs on batteries (included).

A switch for every application

With this wireless wall switch you can switch the desired Trust Switch-in receivers from anywhere in the house. So you can easily operate your lighting, electrical equipment (in combination with the ACC-2300) or even roll-down shutters and sun blinds (in combination with the ASUN-650). The included mounting material allows you to place the switch at the ideal location in your home.

Never forget to switch off the light again

Thanks to the adjustable switch-off function, devices and lights can be switched off automatically after 5 seconds, 1, 10 or 30 minutes or after 1 hour. Ideal for carefree operation in any situation.

Wide range

The signal from the wall switch passes through walls, windows and doors and has a range (indoors) of up to 30 metres.

From smart solutions to a Smart Home

With the Smart Bridge you lay the foundation for your smart home. Link all your Trust Switch-in devices to the Bridge and operate everything - from lighting to electric curtains - with your smartphone or tablet. Or set your own timers, rules and scenes to fully automate your system. For example, the (garden) lights go on at night when you are on holiday and the central heating boiler is switched off when the CO detector detects a carbon monoxide leak.

## Specifications

<b>Weight of main unit</b>	60 g
<b>Height of main product (in mm)</b>	15 mm
<b>Width of main product (in mm)</b>	80 mm
<b>Depth of main product (in mm)</b>	80 mm
